The Good The Monoprice MHD 2.0, like its predecessor, is an affordable, easy-to-use waterproof POV camera with a decent assortment of available mounts as well as a built-in standard quarter-inch ...

Monoprice MHD 2.0 Action Camera review: Simple waterproof ...
Without getting overly technical, focal length of a camera lens defines how wide or narrow you can see. Create a Cinema 4D camera object (Create menu > Camera >Camera) and you'll find the focal length under the object properties in the Attribute Manager. A small focal length like 10mm-15m is considered super wide while a long focal length like 100-200mm is considered telephoto.

Working With Cameras in Cinema 4D - School of Motion
A DCI 4K stream is compressed using JPEG2000, can have a bitrate of up to 250Mbps, and employs 12-bit 4:4:4 color depth. (See: How digital technology is reinventing cinema.

4K vs. UHD: What's the Difference? - ExtremeTech
I'm trying to use the Polaroid setting_min.exe with the MHD and that's the message that gets displayed. I'll look into all of that and update this post with all the new info that I gather. EDIT: I'd like to either open up the option to record at 720p60 on the MHD software or to use the Polaroid software to set up the cam.

The ViewSonic VX2457-mhd is a 24" (23.6" viewable) Full HD price-performance monitor built for gaming and entertainment. Equipped with VESA Adaptive-Sync Technology, this monitor's variable refresh rate capabilities virtually eliminate screen tearing and stuttering for fluid game play during fast-paced action scenes.

During the past century, world-wide energy consumption has risen dramatically, which leads to a quest for new energy sources. Fusion of hydrogen atoms in hot plasmas is an attractive approach to solve the energy problem, with abundant fuel, inherent safety and no long-lived radioactivity. However, one of the limits on plasma performance is due to the various classes of magneto-hydrodynamic instabilities that may occur. The physics and control of these instabilities in modern magnetic confinement fusion devices is the subject of this book. Written by foremost experts, the contributions will provide valuable reference and up-to-date research reviews for "old hands" and newcomers alike.

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Proceedings of the International Conference on Advanced Diagnostics for Magnetic and Inertial Fusion, held September 3-7, 2001 at Villa Monastero, Varenna, Italy. This volume focuses on future diagnostic requirements for fusion energy research emphasizing advanced diagnostics, new techniques and areas where further progress is required.

Dear Friends, It seems like it was only yesterday that we drove the last of you to the airport. The memories and the spirit of the Scientific Detectors for Astronomy Workshop (SDW2002) remain fresh and strong. For us, this was a very special event, a great gathering of what may be one of the friendliest and most cooperative technical communities on our little planet. We have tried to capture the spirit of the Workshop in these Proceedings and we hope you are able to relive your week in Hawaii. For those readers who did not attend, we invite you into this community. As you probably noticed, there is a new name on the cover: Jenna Beletic was the ace up our sleeve for these Proceedings. As a summer intern at Keck, she took up the task of organizing, proofreading, editing and formatting the papers. She also made the graphics (her artistic talents shine on pages xxxiii and xxxv), contacted authors and prepared the mountain of paperwork which goes with producing a book. Jenna's enthusiasm at learning, her passion for the job and creativity (e. g. find 100 ways to get Paola and Jim to do their jobs) have been a motivating addition to our team of "old workshop foxes"..... and a source for a good deal of paternal pride. We are honoured to have her as a fellow editor.
