"American Earth" is a fantastic summary/anthology of not just environmental writing but also a reflection of American patriotism in it's purest form. The book provides essential essays, speeches and excerpts from longer works that reveal how we as a country became aware of our problem with our planet.

A provocative anthology of top-selected American environmental writings from the past two centuries considers their influence on the ways in which people view the natural world and includes pieces by such figures as Henry David Thoreau, John Muir, and John James Audubon. 30,000 first printing.

Author and activist McKibben gathers the essential American writings that changed the way the public looks at the natural world. "American Earth" features essays by Walt Whitman, Rachel Carson, Barbara Kingsolver, Michael Pollan, and dozens more.

Offering guidance on writing poetry, nonfiction, and fiction, Environmental and Nature Writing is a complete introduction to the art and craft of writing about the environment in a wide range of genres. With discussion questions and writing prompts throughout, Environmental and Nature Writing: A Writers' Guide and Anthology covers such topics as: · The history of writing about the environment · Image, description and metaphor · Environmental journalism, poetry, and fiction · Researching, revising and publishing · Styles of nature writing, from discovery to memoir to polemic The book also includes an anthology, offering inspiring examples of nature writing in all of the genres covered by the book, including work by: John Daniel, Camille T. Dungy, David Gessner, Jennifer Lunden, Erik Reece, David Treuer, Bonnie Jo Campbell, Alyson Hagy, Bonnie Nadzam, Lydia Peelle, Benjamin Percy, Gabrielle Calvocoressi, Nikky Finney, Juan Felipe Herrera, Major Jackson, Aimee Nezhukumatathil, G.E. Patterson, Natasha Trethewey, and many more.

The first chronological presentation of U.S. nature writing by key women authors of the last two centuries.

With a basis in environmental history, this groundbreaking study challenges the idea that a meaningful attachment to nature and the outdoors is contrary to the black experience. The discussion shows that contemporary African American culture is usually seen as an urban culture, one that arose out of the Great Migration and has contributed to international trends in fashion, music, and the arts ever since. However, because of this urban focus, many African Americans are not at peace with their rich but tangled agrarian legacy. On one hand, the book shows, nature and violence are connected in black memory, especially in disturbing images such as slave ships on the ocean, exhaustion in the fields, dogs in the woods, and dead bodies hanging from trees. In contrast, though, there is also a competing tradition of African American stewardship of the land that should be better known. Emphasizing the tradition of black environmentalism and using storytelling techniques to dramatize the work of black naturalists, this account corrects the record and urges interested urban dwellers to get back to the land.

American environmental literature has relied heavily on the perspectives of European Americans, often ignoring other groups. In Black on Earth, Kimberly Ruffin expands the reach of ecocriticism by analyzing the ecological experiences, conceptions, and desires seen in African American writing. Ruffin identifies a theory of "ecological burden and beauty" in which African American authors underscore the ecological burdens of living within human hierarchies in the social order just as they explore the ecological beauty of being a part of the natural order. Blacks were ecological agents before the emergence of American nature writing, argues Ruffin, and their perspectives are critical to understanding the full scope of ecological thought. Ruffin examines African American ecological insights from the antebellum era to the twenty-first century, considering WPA slave narratives, neoslave poetry, novels, essays, and documentary films, by such artists as Octavia Butler, Alice Walker, Henry Dumas, Percival Everett, Spike Lee, and Jayne Cortez. Identifying themes of work, slavery, religion, mythology, music, and citizenship, Black on Earth highlights the ways in which African American writers are visionary ecological artists.

Few books have had a greater impact than A Sand County Almanac, which many credit with launching a revolution in land management. Written as a series of sketches based principally upon the flora and fauna in a rural part of Wisconsin, the book, originally published by Oxford in 1949, gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; a final section addresses the philosophical issues involved in wildlife conservation. Beloved for its description and evocation of the natural world, Leopold's book, which has sold well over 2 million copies, remains a foundational text in environmental science and a national treasure.

A Voice for Earth is a collection of poems, essays, and stories that together give a voice to the ethical principles outlined in the Earth Charter. The Earth Charter was adopted in the year 2000 with the mission of addressing the economic, social, political, spiritual, and environmental problems confronting the world in the twenty-first century. Part 1 of the book, "Imagination into Principle," comprises Steven C. Rockefeller's behind-the-scenes summary of how the language for the Earth Charter was drafted. In part 2, "Principle into Imagination," ten writers breathe life into its concepts with their own original work. Contributors include Rick Bass, Alison Hawthorne Deming, John Lane, Robert Michael Pyle, Janisse Ray, Scott Russell Sanders, Lauret Savoy, and Mary Evelyn Tucker. In part 3, "Imagination and Principle into a New Ethic," Leonardo Boff offers a new paradigm created through reflecting on the concept of care in the Earth Charter.

Reissued on the tenth anniversary of its publication, this classic work on our environmental crisis features a new introduction by the author, reviewing both the progress and ground lost in the fight to save the earth. This impassioned plea for radical and life-renewing change is today still considered a groundbreaking work in environmental studies. McKibben's argument that the survival of the globe is dependent on a fundamental, philosophical shift in the way we relate to nature is more relevant than ever. McKibben writes of our earth's environmental cataclysm, addressing such core issues as the greenhouse effect, acid rain, and the depletion of the ozone layer. His new introduction addresses some of the latest environmental issues that have risen during the 1990s. The book also includes an invaluable new appendix of facts and figures that surveys the progress of the environmental movement. More than simply a handbook for survival or a doomsday catalog of scientific prediction, this classic, soulful lament on Nature is required reading for nature enthusiasts, activists, and concerned citizens alike.

John Burroughs was one of the earliest and most articulate pioneers of the United States conservation movement, publishing twenty-eight books on the natural world during the height of the Industrial Revolution. As an author, teacher, and poet, he wrote with intimacy and feeling, illustrating verbal landscapes and providing philosophical insights about the environment. People by the hundreds of thousands relished his writings. His friends included Walt Whitman, Theodore Roosevelt, Thomas Edison, and John Muir. Burroughs was dedicated to studying the world and making nature come to life on the written page.
