The clutch pedal is the one that makes driving a manual car more difficult than an auto. Without going into too much detail, the clutch is essentially two metal plates that connect the engine to the drive wheels. So by pressing down on the clutch pedal, you're disconnecting the engine from the wheels.

As you drive and need to go faster, you'll need to shift up. The process is similar to how you shifted to put the bus in motion. Once again, if you are driving an automatic, you can skip this step. Push the clutch in with your left foot. As you do, take your right foot off the accelerator. Shift up into the next gear.
