Advances in Investment Analysis and Portfolio Management (New Series) is an annual publication designed to disseminate developments in the area of investment analysis and portfolio management. The publication is a forum for statistical and quantitative analyses of issues in security analysis, portfolio management, options, futures, and other related issues. The objective is to promote interaction between academic research in finance, economics, and accounting and applied research in the financial community. The chapters in this volume cover a wider range of topics including equity markets, risk return trade-off analysis and portfolio management, and IPOs. In this volume there are 10 chapters, four of them analyze the issues of equity markets: 1. Revisiting U.S. Stock Market Returns: Individual Retirement Accounts; 2. Asset Returns and Monetary Policy in the Emerging Taiwan Financial Markets; 3. On the Intradaily Relationship between Information Revelation and Trade Duration: The Evidence of MSCI Taiwan Stock Index Futures; and 4. Does the Net Flow of Funds Help to Predict the S&P 500 Index? Four of the other six chapters discuss risk return trade-off analysis and portfolio management: 1. An Intertemporal Analysis of Optimal International

Asset Allocation; 2. Complexity and the Performance of Investment Portfolios; 3. The Similarity Between Mean-Variance and Mean-Gini: Testing for Equality of Gini Correlations; 4. Estimating Capital Market Parameters: CRSP Versus Yahoo Data. The remaining two papers are related to IPOs: 1. Distinguishing Quality within the IPO Market and 2. Do IPO Firms have Lower Risk? Evidence from IPO Performance in Different States of the World? In sum, this annual publication covers equity markets, IPO, risk return trade-off analysis, and portfolio management. Therefore, the material covered in this publication is not only useful for academicians and but also for practitioners in the area of Finance.

The purpose of this text is to help the student learn how to manage their money to derive the maximum benefit from what they earn. Mixing investment instruments and capital markets with the theoretical detail on evaluating investments and opportunities to satisfy risk-return objectives along with how investment practice and theory is influenced by globalization. The material is intended to be rigorous and empirical yet not overly quantitative. Reilly/Brown provides the best foundation, used extensively by professionals, organizations, and schools across the country. A great source for those with both a theoretical and practical need for investment expertise.

This textbook is designed as a core text for finance courses that cover market investments, portfolio formation, and the management of investment portfolios. As such, the text seeks to convey insight and actual wisdom as to the nature of these activities. When combined with a commitment to thinking independently, the text offers the student a rigorous preparation for entry to the funds management industry. The text is presented in three parts. In Part A, the text introduces the fundamental techniques of investment analysis: a "bottom-up" and "top-down" analysis of the firm aimed at an evaluation of the underlying share as a "buy", "hold", or a "sell" recommendation. Part B offers the reader an intuitive grasp of the nature of investment growth, both across time and across assets. Part C introduces the reader to the technicalities of portfolio construction and portfolio management. The text concludes with an assessment of the funds management industry. The text builds in step-by-step stages with Illustrative Examples that consolidate the student's progress and understanding through each chapter. Each of parts A, B, and C (above) has sufficient material to justify a separate course. If the student has exposure to a more foundational course in finance, Parts A and B can be covered as a single course. If from other courses, the student is familiar with the essence of Parts A and B and with statistical concepts, the text can be covered as a single course. The text can therefore be presented readily at either an undergraduate or postgraduate level at a pace appropriate to the student's prior exposure to the concepts.

This research annual publication intends to bring together investment analysis and portfolio theory and their implementation to portfolio management. It seeks theoretical and empirical research manuscripts with high quality in the area of investment and portfolio analysis.
