A guide layer is a layer that's invisible in the final, published Flash animation. You can use guide layers for several purposes:

Animation: You can place a path on a guide layer to control the motion of an object during animation. **Layout:**

Motion Guide In

Motion Tween: A motion tween is a feature available in Adobe Flash (formerly Macromedia Flash) that allows you to easily animate the motion of an object. Instead of defining the location of the object in every frame, you can create a motion tween, which will automatically move

Online Library Motion Guide In

the object from the beginning location to ending location.
