Thomas appreciated the fact that Hawkins was willing to go out on a limb, and present an eye-opening theory about human intelligence—even if it is of a speculative nature. He liked the logical and engineering-oriented nature of the theory Hawkins presented.

Review and comments page: 'On Intelligence', by Jeff Hawkins

Hawkins applies his own engineer's mind to an effort to discern and describe the human brain's underlying "cortical algorithm", the means by which intelligence "works". As Hawkins sees it, the neuroscience community has been too focused on the minutiae of how neurons function, without giving adequate consideration to the brain's overall learning and decision-making architecture, while the computer science community has been too absorbed in traditional symbolic and procedural computation ...
